

My name is Peng Zhihao from China, Shanghai. The course which I studied in Shelton is International business management.

My internship company is Juzz1; this is a reseller of digital products, such as Apple, Lenovo and Sony. There are so many types of laptops and products; there is something like Mac which has its own system that is very different from others. Most of the laptops they are using are windows system and this difference attracts many different customers.

This company is a very big company; there are many branches in Singapore. Colleagues are very friendly to me. Because, I do not know so much information and knowledge about this industry so that there are many staffs that I do not know. My colleagues like to teach me how to do and encourage me too. My manager is a kind person, sometimes, if I have any queries, I will ask him, and he is always there to help me. I have worked in 3 branches, so there are managers that I am working with. They are very kind and would always like to give advices and to help me improving myself. Stock day is very hard work, because, there are many products in the store, even that is hard, we would do it together, this is team-work, so, I enjoy the time with them. We like to help each other and it made me feel like a big family. We always share interesting things after work, I also joined some parties in the company, I was surprised when I got the prize there and have a fun time with my colleagues and bosses. This is totally an amazing experience for me.

Before I did my internship, I was studying the course of business. The teachers are very positive in giving us advices for our assignments and homework. In the class, teachers like to give us some topic so we can make discussions and it is very interesting to share our thoughts with our fellow classmates and teachers. This is good as we would pay more attention in class.

Before internship, the internship department will provide us with tips and advice for the interview which I fill that really benefit me. Sometimes, the results of the interview were not what we wanted but they always provide us with encouragement which gives us the chance and opportunity to believe in ourselves! During the internship, teachers are also very caring about our internship life; they would give us some calls to ask if there is anything they could help us with.

The school's quality of services is very good impression for me. Teachers would try to satisfy us about some reasonable request. They are willing to help me and very friendly to help us too.

The teachers in Shelton are very kind and very caring for the students' life, if you need to ask something about the way of life in Singapore, they will very happy to help you. As an international student, we should have good relationships with both the students and teachers. Singapore is a multicultural country; therefore, respecting one another is very important for our life in Singapore, by joining a good school, you will be able to widen your knowledge.

This is not only experience but it will make differences in your life and future career. Choose a good school and have a good life attitude, both are very important for us in the future.

Thank you Shelton!
